

Please tick the boxes below that apply to this project, and where the applicant performed the tasks competently.

The applicant competently:

- understood current building and trade practices at the time of construction
- ensured that the site was properly set up prior to starting construction
- dealt with all problems and issues that occurred during construction (or ensured that the problems were dealt with by the appropriate people)
- ensured that an acceptable standard of quality was maintained
- communicated any changes in design to the appropriate staff and subcontractors
- ensured that the trades worked together (made sure that the work of one trade did not compromise the work of another)
- communicated effectively with me on areas where the construction needed to be adjusted due to site conditions or changes in design
- obtained additional input or clarification on areas of possible misunderstanding
- ensured the safety of all visitors, staff and subcontractors throughout construction
- ensured that construction met the needs you had communicated at the outset.

Comments

Please provide any specific examples of how the applicant demonstrated their competence in the tasks you have ticked above.

Brent has an excellent range of subcontractors and demanded a high standard from them
 Brent & his team were able to address the changing scope of the project
 In general the project was professionally run and with our priorities in mind

Would you recommend the applicant's work to others? Please explain why or why not.

We would recommend Brent & his team. We managed to live in the house while the work was taking place and his guys showed consideration for 3 young children and one stressed wife.

Please note: An assessor may contact you to discuss this report further. By asking you to complete this form the applicant is giving his or her permission for this to take place.
